

Newronium — Data & AI Client Intelligence Form

This form helps your GTM Engineer build the right outbound strategy from day one. Your answers define the ICP, the messaging, the outreach markets, and the social proof we use to open doors for you. 15–20 minutes to complete.

Data & AI Service

Focus: Europe (EU)

Confidential

Why this form exists: Before any outreach is sent, your GTM Engineer needs to understand your market from the inside — your best clients, your strongest results, what resonates with buyers, and what your team has already tried. This form replaces 3–4 alignment calls and gets us moving faster.

1 Company & Service Understanding

Foundation

1.1 How would you describe the Data & AI service in one sentence — the way a client would explain it to a colleague?

Not the technical definition. How does a non-technical buyer describe the value they got?

e.g. 'They turned our messy data into a system our whole team actually uses to make decisions.'

1.2 What is the one problem the Data & AI service solves that others don't — or don't solve as well?

Your honest differentiator...

1.3 Which of the 3 service lines is currently most in demand from clients?

☐ Data Stack & Architecture

☐ Data Engineering (Pipelines)

☐ Analytics + Applied AI

☐ All equally

1.4 What is the typical engagement duration and budget range for a Data & AI project?

Approximate is fine — helps calibrate the target company profile.

e.g. 3–6 months / €30k–€120k per project

2 Your Ideal Customer Profile (ICP)

Targeting

Note: Describe your BEST clients — the ones that were easy to work with, valued the work, paid on time, and got real results. Not your average client. Your best one.

2.1 What company size (employees) is your sweet spot?

☐ Under 50

☐ 50–200

☐ 200–500

☐ 500–1,000

☐ 1,000–5,000

☐ 5,000+

2.2 Which industries have been your best-fit clients?

☐ Financial Services

☐ Fintech

☐ Insurance

☐ Retail / E-commerce

☐ Logistics

☐ Manufacturing

☐ Health / MedTech

☐ SaaS / Tech

☐ Telecoms

☐ Energy / Utilities

☐ Public Sector

☐ Other

Any other industries or specify 'Other'...

2.3 Who is typically the main decision maker or buyer for this service?

☐ CEO / Co-founder

☐ CTO

☐ CDO (Chief Data Officer)

☐ COO

☐ Head of Data

☐ VP Analytics

☐ Head of AI / ML

☐ IT Director

☐ CFO

☐ Other

Other decision makers...

2.4 What specific situation or trigger makes a company start looking for this service?

e.g. recent funding, new hire, failed internal project, compliance pressure, new product launch...

What usually happened at the company in the 3–6 months before they reached out to you?

2.5 Which type of company have you had the WORST experience with? (to exclude from targeting)

e.g. 'Very early startups with no data yet', 'Large enterprises with long procurement cycles'...

3 Current & Past Clients

Lookalike Source

This is the most important section. Your current clients are the template for finding the next ones. Even anonymised entries (e.g. "Mid-size fintech, 300 people, Lisbon") are incredibly useful for building lookalike searches in Apollo.

3.1 List your current or most recent clients for the Data & AI service

Name can be anonymised. Fill in as many rows as possible — industry and service delivered matter most.

CLIENT NAME (OR ANONYMISED)	INDUSTRY	COUNTRY	COMPANY SIZE	SERVICE DELIVERED	RESULT / OUTCOME

3.2 Are there existing clients from Optiwisers or New Normal (other Newronium verticals) that could benefit from the Data & AI service?

☐ Yes — we have identified some

☐ Possibly — not explored yet

☐ No

If yes, briefly describe those opportunities...

3.3 How did most of your current clients find you? (main acquisition channel so far)

☐ Personal referral☐ LinkedIn outreach☐ Events / conferences☐ Partner referral☐ Cold email☐ Website / SEO☐ C2 Capital network☐ Other

4 Case Studies & Social Proof

Outreach Fuel

Why this matters: Cold emails with a real result (e.g. "reduced reporting time by 60%") convert 3–5x better than generic service descriptions. We need at least 2 anonymised examples to run effective outreach.

4.1 Do you have any documented case studies or client success stories?

☐ Yes, published publicly☐ Yes, internal only☐ Partial / in progress☐ No, not yet

4.2 Describe your strongest client result (can be anonymised)

Industry → Problem → What you delivered → Measurable outcome. Be as specific as possible with numbers.

e.g. 'A fintech company (300 people, Lisbon) had 6 data sources with no central warehouse. We built a unified data stack on Snowflake + dbt in 10 weeks. Reporting time went from 5 days to same-day. The analytics team grew from 1 to 5 people using the platform.'

4.3 Describe a second strong result (different industry if possible)

Second example...

4.4 Do you have any client quotes or testimonials we can reference?

Even informal — e.g. a LinkedIn recommendation, a WhatsApp quote, an email compliment...

4.5 What measurable results do you most commonly deliver? (tick all that apply)

☐ Reduced reporting time☐ Faster decision-making☐ Reduced data team workload☐ Cost reduction☐ Revenue increase☐ Churn reduction

Fraud detection improvement

Predictive model in production

Dashboard adoption increase

Cloud migration completed

Data pipeline reliability

Compliance / governance

5

Technology Stack & AI Tools Used

Credibility Signal

5.1 What data & AI technologies does Newronium / Valuedate use internally or deliver to clients?

Snowflake

Databricks

dbt

Apache Spark

Airflow

Power BI

Tableau

Metabase

AWS (Redshift, S3, Glue)

Azure (Synapse, ADF)

GCP (BigQuery)

Python / Scikit-learn

OpenAI / Azure OpenAI

LangChain / RAG

MLflow / MLOps

Great Expectations

Other tools not listed...

5.2 Have you helped clients with technology migrations? If yes, what kind?

e.g. from legacy BI to Snowflake, from on-premise to cloud, from Excel to a modern data warehouse...

Describe migrations you've done — from what, to what, for which type of company...

5.3 Do you use AI tools internally for your own operations or GTM? (e.g. ChatGPT, Copilot, Clay, Apollo, HubSpot AI...)

List tools you use internally...

5.4 Do you have any technology partnerships or certifications? (e.g. AWS Partner, Microsoft Partner, Snowflake Partner)

Any official partnerships or certifications...

Priority market is the EU. Portugal, France and Switzerland are your current active countries. Use this section to define which other EU countries you want to expand into — this directly drives where we build prospecting lists.

6.1 Within the EU, which countries are priorities for outreach? Start from your current markets and expand the list.

Portugal, France and Switzerland are already confirmed. Add every other EU/European country you want us to target — even if it's aspirational for now.

COUNTRY	PRIORITY (HIGH / MEDIUM / LOW / FUTURE)	PREFERRED OUTREACH LANGUAGE	EXISTING CONTACTS OR CLIENTS?
Portugal	High / Medium / Low / Futur	Portuguese / English	Yes / No
France	High / Medium / Low / Futur	French / English	Yes / No
Switzerland	High / Medium / Low / Futur	French / English / German	Yes / No
e.g. Spain			
e.g. Netherlands			
e.g. Germany			
e.g. UK			
Add more...			

6.2 Are there specific industries to prioritise or avoid per country?

e.g. "In France focus on FSI, avoid public sector" · "In Switzerland only fintech and pharma" · "In Spain all sectors are open"

Country-specific focus or restrictions...

6.3 Are there EU countries or regions you want to avoid entirely for now?

e.g. Eastern Europe, Nordics, Balkans — or none at all...

6.4 Do you have any event presence or conferences planned across Europe?

Events are great outreach triggers — "I'll be at Web Summit in Lisbon in November" dramatically increases reply rates.

Upcoming events, speaking slots, or conferences across EU markets...

7.1 What outreach or sales approaches have you tried before?

e.g. LinkedIn messages, cold email, referrals, events, paid ads...

7.2 What has worked? What has not worked?

Be honest — this saves time and budget. If cold email failed, we need to know why.

7.3 What objections do prospects most commonly raise?

e.g. "We already have an internal data team", "Not a priority right now", "Too expensive"...

Top 3 objections you hear...

7.4 What is the typical sales cycle length from first contact to signed contract?

☐ Under 2 weeks

☐ 2–4 weeks

☐ 1–3 months

☐ 3–6 months

☐ 6+ months

7.5 Who are your main competitors and how do you typically position against them?

Competitor names and your winning argument vs each...

8.1 How many qualified meetings per month is the minimum acceptable result?

e.g. 10 meetings held per month, 80% show rate...

8.2 What does a "qualified lead" mean to Newronium — your exact internal definition?

e.g. Has budget confirmed? Right company size? Specific job title? Pain identified on call?

Your exact definition of qualified...

8.3 What happens after the GTM Engineer hands off a qualified lead — who takes it and what is the next step?

Internal process: who receives the lead, what happens next, who closes...

8.4 Any other information, context, or constraints the GTM Engineer needs to know before starting?

Anything else relevant — internal politics, sensitive accounts to avoid, specific timing constraints...

Thank you for completing this form.

Once received, your GTM Engineer will build the ICP filter list, lookalike search, and first outreach sequences within 5 business days.
